PROFILE

Second-year ASIX student with an interest in cybersecurity and systems administration. I like understanding how systems work and tracing problems to their source. In my own projects, I manage a Linux server, automate tasks and develop open source tools.

EDUCATION

Institut Sa Palomera — Blanes

Higher vocational diploma in Networked Computer Systems Administration (ASIX) — 2025 – 2027
Second year, in progress

Intermediate vocational diploma in Microcomputer Systems and Networks (SMX) — 2023 – 2025
Completed

EXPERIENCE

iDiomund, SL — Blanes

Technician, work placement — Oct 2024 – Mar 2025

- Prepared and tracked customer orders in the Odoo ERP.
- Created and maintained catalogue products in Odoo, including their photos.

PERSONAL PROJECTS

Antevue — nilparra.dev/#projects/antevue

Side project that collects football data every matchday on my own Linux server: Docker, PostgreSQL, jobs scheduled with systemd and Airflow, and Grafana for monitoring.

nilparra.dev — github.com/nilparra-dev/nilparra.dev

My personal site: a Windows 95 desktop that runs in the browser, built with React and TypeScript.

Wooster — github.com/nilparra-dev/wooster

Open source command-line tool in TypeScript that finds Twitch VODs, hidden ones included, and returns a playable M3U8 URL. Published on npm.
